Description

PORSCHE CABRIO TOP CLEANER & WASH SHAMPOO - 250 ML

BOTTLE - 250 ml Bottle with Measuring Cap - An intensive cleaner designed specifically to thoroughly clean all canvas cabriolet tops and remove even the most stubborn dirt prior to application of a coat of Cabrio Top Protectant. Mix two caps full with 5 liters of water, apply to the wet top, work in with a sponge or soft bristle brush and rinse thoroughly with lots of water. Gently brush the wet top with the palm of your hand, while rinsing the top, to insure that all traces of the cleaner has been rinsed from the fibers. Do not use in direct sun. If the top does not bead water, then the water proofing protectant coating should be replenished.

11602 Porsche Cabrio Top Cleaner & Wash Shampoo - 250 ml Bottle

PORSCHE CABRIO TOP PROTECTANT - 400 ML AEROSOL - 400 ml Aerosol Can - An aerosol protectant specifically formulated for all canvas convertible/cabrio tops that protects the top material from the elements, sun damage, fading and waterproofs all in one operation. Spray on a just cleaned top when it is just damp dry. Be sure to mask off all the windows and paint prior to spraying the top. The simple method to determine the condition of the current coat of top protectant is the "water bead" test. If the top "beads water" when wet, then the existing coat of protectant is good condition. If water does not bead or it soaks into the top material, then it is time to apply a coat of the protectant. (UPS Ground Shipment Only.)

11603 Porsche Cabrio Top Protectant - 400 ml Aerosol

PORSCHE LIQUID HARD WAX - 250 ML BOTTLE - A liquid wax formulated specifically for the European paints that may be applied by hand or by slow speed buffer using Meguiars Softbuff Polishing Pads. Work a small amount into the surface of the paint until all that remains is a slight haze and then buff out by hand with a Blu-Velvet Microfiber Buffing/Polishing Cloth or a 100% cotton flannel cloth.

11650 Porsche Liquid Hard Wax - 250 ml Bottle
