Description

**RENOVO CLEAR PLASTIC & WINDOW POLISH**...A great one step cleaner and polish that will remove or reduce clouding, fine scratches and help restore the transparency to all clear plastic. Shake the bottle well and apply a very small amount to a Blu-Velvet Microfiber Applicator Pad or a soft, 100% cotton flannel cloth, work into the surface with moderate pressure, until all that remains is a faint haze. Burnish to a shine with a Blu-Velvet Microfiber Buffing/Polishing or a soft, 100% cotton flannel cloth. Some areas may require 2-3 applications. Use on convertible rear windows, lens covers, brake lights, headlight covers, motorcycle fairings, airplane windows, bug deflectors, helmet visors, Lexan, Plexiglas, acrylic, etc. The absolute best product we have found to remove the "hazing" from clear plastic headlight covers. If hand application does not remove the clouding, Renovo Plastic Polish may also be applied with a small buffer or electric drill and a soft foam buffing pad. Burnish to a shine with a Blu-Velvet Microfiber buffing/polishing or soft, 100% cotton flannel cloth.

- 10301 Renovo Plastic Window Polish, 30 ml Bottle
- 10302 Renovo Plastic Window Polish, 100 ml Bottle

**RENOVO FABRIC SOFT TOP CLEANER**...A versatile liquid fabric top cleaner that may be used either full strength or diluted with water for different cleaning problems. Use full strength to deep clean and prepare fabric tops prior to an application of either Renovo Reviver or Renovo Fabric Soft Top Ultra Proofer. May also be mixed with 25% to 75% water to gently remove dirt, tree sap and bird droppings from all fabric tops, RV and boat covers. Prior to application, gently brush the surface with a soft brush to remove any loose dirt. Shake the bottle well, pour into a suitable container and spread a thin, even coat over the surface with a sponge, nylon paint brush or disposable foam brush. Gently agitate the cleaner with a soft bristle brush, sponge or cloth. Stubborn stains may require the cleaner to remain on the top for approximately 30 minutes and gentle scrubbing with a soft bristle brush. Be careful not to allow the brush to come in contact with the plastic window as it may scratch the window. To remove the cleaner, either hose off or wipe off with a wet sponge or cloth, continually rinsing the cloth/sponge in clean water. Make sure that all traces of the cleaner are removed, then allow the top to dry completely before applying either Renovo Soft Top Reviver or Renovo Fabric Soft Top Ultra Proofer.

- 10355 Renovo Fabric Soft Top Cleaner, 500 ml Bottle

**RENOVO FABRIC SOFT TOP REVIVER**...The ultimate product to make old, faded, fabric convertible tops, RV and boat covers look like new. A permanent, water based dye that may be applied with either a nylon paint brush, sponge, disposable foam brush or air brush and dries in 2-3 hours. Badly faded tops may require a second coat. Clean the surface thoroughly with Renovo Fabric Soft Top Cleaner and then allow it to dry completely. Use 3M Blue Masking Tape to mask off the rear window, the glass and paint. Start the application at the center section of the front of the top. Work from side to side, progressing towards the back, maintaining a "wet edge" as you work towards the rear. (The technique is similar to painting with water based paint). Immediately remove any drips on paint, glass or trim with a wet cloth. If the top is badly faded, apply a second coat after 24 hours drying time. Allow the final coat of Reviver to dry for 24 hours and then follow with a coat or two of fabric top protectant to protect and prolong the life of your new looking top.  
**DO NOT use on vinyl or vinyl impregnated fabric tops.** When in doubt, consult the manufacturer. A 500 ml bottle will normally cover the average top with one coat.

- 10315 Renovo Fabric Soft Top Reviver – Dark Blue, 500 ml
- 10316 Renovo Fabric Soft Top Reviver – Dark Blue, 1 Liter
- 10325 Renovo Fabric Soft Top Reviver – Dark Brown, 500 ml
- 10326 Renovo Fabric Soft Top Reviver – Dark Brown, 1 Liter

## PRODUCT LIST - 2010 RENOVO - CAR CARE PRODUCTS

Product  
Number

Product  
Description

**RENOVO VINYL SOFT TOP CLEANER**...Deep-cleans heavily soiled vinyl and vinyl coated fabric tops, boat covers, motorcycle covers and RV covers. It will safely and effectively remove imbedded grime, tree sap and bird droppings. Brush or sponge on a thin coat, allow it to clean for a few minutes, gently scrub with a sponge, soft cloth or soft brush to loosen stubborn dirt, rinse thoroughly with water to remove all traces of cleaner and then dry. Heavily soiled or surfaces with deep graining may require the cleaner to work for up to an hour, before rinsing, and gentle brushing with a soft bristle brush to remove the imbedded dirt. Immediately remove any drips on paint, glass or trim with a wet cloth. Once the clean top/cover has completely dried, follow immediately with an application of Renovo Vinyl Ultra Proofer. Always test a small area prior to use to insure colorfastness of the material. **Do not use on fabric tops.**

**10370 Renovo Vinyl Soft Top Cleaner, 500 ml Bottle**

**RENOVO VINYL SOFT TOP ULTRA PROOFER**...Conditions, protects and prolongs the life of all vinyl and vinyl coated fabric tops. Vinyl Ultra Proofer forms a UV barrier that helps prevent premature fading of vinyl and acts as a shield against the ravages of dirt, stains, tree sap, and bird droppings. Clean the top thoroughly with Vinyl Soft Top Cleaner and allow the top to completely dry. Pour the Vinyl Top Ultra Proofer into a suitable container. Then use a 2" wide nylon paint brush, disposable foam brush or foam paint roller to apply a thin even coat over the entire surface. Immediately remove any drips on paint, glass or trim with a wet cloth. Allow to dry for 2-3 hours before folding the top. **Do not use on fabric tops.** A 500 ml bottle will normally cover the average top with one coat.

**10375 Renovo Vinyl Soft Top Ultra Proofer, 500 ml Bottle**
